STATISTICAL METHODS I

SPRING 2021

STAT 2300 SYLLABUS

VAGNOZZI

Welcome to **STAT 2300**! Review this syllabus to become familiar with the details of our class this semester — think of it as a contract between you, the student, and the instructor.

General Syllabus

This document is a supplement to the **General Course Syllabus**, which can be found on the STAT 2300 Course Page at https://mthsc.clemson.edu/ug_course_pages/STAT2300. This course will follow all course information and policies established in the General Syllabus.

Section Details

Section 001	MW 8:00 AM—8:50 AM EST
Section 002	MW 9:05 AM—9:55 AM EST
Section 006	MW 1:25 PM—2:15 PM EST

Instructor

Virtual Office Hours

Anna Marie Vagnozzi Tues. 2:00-5:00 PM EST (by appointment)

<u>avagnoz@clemson.edu</u> Thurs. 2:30-3:45 PM EST (drop-in)

About Me: I completed my M.S. in Mathematical Sciences at Clemson University and my B.S. in Mathematics at Campbell University (Go Camels!). When not teaching math, you can usually find me hiking, making homemade pasta, propagating succulents, or curled up with a good book and mug of coffee.

Communication

This course uses **Canvas** to post announcements, lecture materials, grades, assignments, exams, and other relevant information. You are responsible for checking Canvas regularly.

Email is the preferred method of communication with the instructor for this course. I will generally respond within 24 hours on weekdays. Emails sent after 5 PM EST or on weekends are not guaranteed to be answered before the next business day, but feel free to send an email at any time and I will respond as soon as I am able.

Students are also encouraged to ask questions in the **Clemson Math Corner Discord Server**. You can use this to connect not only with me, but also with your fellow STAT 2300 students!

Course Modality

Your section of STAT 2300 is an **online synchronous course**. All class sessions, assignments, exams, and office hours will be conducted virtually. Even though you will not attend classes on campus, you <u>are</u> expected to attend the class meetings held via Zoom at the scheduled times for your section. Please refer to the **Attendance and Missing Class** section on the following page for more details.

STAT 2300 is a **coordinated course**. All sections of STAT 2300 (including ours) follow the policies and procedures outlined in the General Course Syllabus. In addition, the Unit Tests and Final Exam will be held at the common exam times, which occur outside of regular class time. See the **Important Dates** section for these dates and times to ensure that they are in your personal calendar.

Course Activities

Aside from exams, there are three components of your grade designed to help you develop your understanding of statistics and gain valuable practice applying statistical methods.

Lecture & Section Grade

Live **lectures** will introduce material, provide **examples** from the **Lecture Notes**, and include **Section Grade*** activities to check your understanding.

MyLab Statistics (MLS) Homework

For each section of material covered, you will complete an online **homework assignment** in Pearson MyLab Statistics.

Lab Assignments

You will complete ten **labs** in your section of STAT 2301 to gain hands-on practice using **JMP** statistical software.

See your STAT 2301 syllabus for more detail.

*Your **Section Grade** will include (but is not limited to) participation in **Zoom polls** during each MW class session and course **check-in surveys** roughly every other week.

Attendance and Missing Class

Attending class is highly valuable for success in this course, and you are expected to attend class via Zoom at the time indicated on your class schedule. **Participation in Zoom polls** during interactive lectures will be used as a record of attendance. Students are marked as attended and receive full credit for an activity by responding to all Zoom poll questions presented in a given class session.

In the event of an absence, you are responsible for learning the material covered in class. Please notify your instructor **prior to the class period missed** to request the ability to make up the in-class activity. Requests to make up the in-class activity for credit communicated **after** the class period has passed will only be granted under extreme circumstances at the discretion of the instructor.

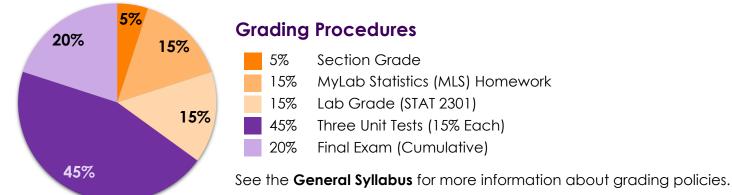

To account for unexpected absences, **five (5)** missing in-class activity grades will be dropped at the end of the semester before final grades are calculated.

Due Dates and Late Work

All assignments will be due at 11:59 PM EST on the due date unless otherwise specified (note that some due dates are adjusted on exam days). More information about due dates can be found in the Course Calendar.

To request an extension, you should email your instructor **before the due date** for the assignment in question. If a deadline is missed, students may submit the assignment for half credit within 24 hours of the original deadline. Permission to turn in late work after the deadline will only be granted under extreme circumstances at the instructor's discretion. Once a Unit Exam has passed, no additional work may be turned in for that unit.

Important Dates

January 6 First Class Meeting

January 18 Martin Luther King, Jr. Day (No Class)

January 20 Last Day to Drop Course

February 8 Test #1, 5:30-7:00 PM EST (Online)

March 8 Test #2, 5:30-7:00 PM EST (Online)

March 12 Last Day to Withdraw from Course

March 15-19 Spring Break (No Class)

April 12 Test #3, 5:30-7:00 PM EST (Online)

April 26 Final Exam, 11:30 AM—2:00 PM EST (Online)

Additional information on assignment due dates can be found in the Course Calendar.

Commitment to Diversity & Inclusion

It is my goal to create a welcoming environment in the classroom that invites different perspectives and respects individual differences. Students are expected to treat one another with respect and kindness at all times.

Tips for Success In This Course

- **Come to class!** You gain the most from the course when you attend class Zoom sessions regularly, participate in the in-class activities, and engage with your instructor and classmates.
- Attend office hours. You don't need to be "stuck" to come to office hours. Office hours can be for touching base about your progress in the course, asking questions, reviewing material, studying for an exam, and even doing homework and asking questions as you go.
- Communicate with the instructor. Life happens, and it's normal to occasionally miss a due date, get a grade you didn't expect, or want additional clarification on an assignment. The key is to communicate with me and let me know what's going on. My email inbox is always open.
- If you don't understand, ask. Whether it's in class, during office hours, or via email, ask questions to clarify concepts that are fuzzy to you. Remember that learning is a two-way street. As your instructor, I'm here to help, but you are responsible for asking for that help if you're struggling.
- Use a pencil and paper (or a tablet!). Math is hands-on. Take notes in class and work problems along with me. Even when working online exercises, take time to work out problems by hand and save them to use as a study resource.
- **Stay organized.** I recommend keeping a binder or folder to save your written work and a paper or digital calendar to keep track of assignments.
- Complete all assignments. Math takes a lot of practice! Take advantage of all the work assigned to boost your grade and better learn the material.
- Remember that this course is what you make it. While learning statistics in an online course can be challenging, approaching the course with a willingness to learn, engage, and work hard will go a long way in helping you succeed.

I'm looking forward to having you in my course this semester.

Let's learn some statistics!

Course Information and Policies (General Syllabus)

Course Description

This course introduces basic statistical concepts and methods of statistical inference. Course topics include data collection, organization and presentation of data, measures of central tendency and variation, elementary probability, the binomial distribution, the normal distribution, sampling distributions, confidence intervals, hypothesis tests, correlation, and simple linear regression. This course stresses the role of statistics in interpreting research and the general application of the methods. Statistical software will be used for analyzing data.

Prerequisites

To enroll in STAT 2300 a student must have credit for any MATH or STAT course, or a score of 620 or higher on the SAT Math section, or a score of 26 or higher on the ACT Math section, or a score of 65 or higher on the Clemson Mathematics Placement Test (CMPT). This course is not open to students who have received credit for MATH 3020 or STAT 3090.

General Education Competencies

This course satisfies 3 credits of the **Mathematical**, **Scientific**, and **Technological Literacy** general education requirement, and specifically addresses the following general education competencies:

B. Mathematics

Demonstrate mathematical literacy through solving problems, communicating concepts, reasoning mathematically, and applying mathematical or statistical methods, using multiple representations where applicable.

H. Critical Thinking

Demonstrate the ability to assemble information relevant to a significant, complex issue, evaluate the quality and utility of the information, and use the outcome of the analysis to reach a logical conclusion about the issue.

Learning Objectives

- 1. Distinguish between a population and a sample, and explain the process and relevance of statistical inference.
- 2. Understand how to produce data that provide clear answers to properly posed questions.
- 3. Identify variables as either quantitative or qualitative and select appropriate statistical techniques on this basis.
- 4. Create and interpret graphical displays and numerical summaries of data.
- 5. Apply the basic rules of probability, and extend those principles to discrete and continuous probability distributions.
- 6. Understand the concept of a sampling distribution and how it applies to making statistical inferences about a population based on sample data.
- 7. Calculate and interpret confidence intervals for one and two population proportions and for one and two population means.
- 8. Conduct hypothesis tests for one and two population proportions and one and two population means, and draw appropriate conclusions from their results.
- 9. Analyze the association between two quantitative variables using linear regression techniques.

Required Materials

1. Course Packet

Students have the option of purchasing the STAT 2300 course packet of lecture notes from the Campus Copy Shop (www.campuscopyshop.com) (\$33.84). Electronic copies of the notes will also be supplied on Canvas during the semester if students would prefer to print the notes themselves or take notes on a tablet or computer. If you will not be in Clemson and would like the packet shipped to you (cost with shipping is \$44.54), please fill out the following Google Form and the Copy Shop will contact you to place an order:

 $\frac{https://docs.google.com/forms/d/e/1FAIpQLSethnmPEXb_tjiBgt3ViXS1zo3nQ4FnuGvDOa7gSDKqP13sYg/viewform$

Campus Copy Shop

189 Old Greenville Hwy. Suite A Clemson, SC 29631 P 864.654.3863 Monday - Friday 9:00am - 5:30pm www.campuscopyshop.com

2. MyLab Statistics

Students must purchase a MyLab Statistics access code associated with *Statistics: Informed Decisions Using Data*, 6th edition (2021) by Michael Sullivan. Instructions for signing in to MyLab Stat for the first time will be on Canvas (a 14 day free trial is available if needed). MyLab Stat will be integrated into your Canvas course. There are several options for purchasing MyLab Stat access:

- Purchase MyLab Stat with eBook "18-week" access directly from Pearson when you sign in to MyLab Stat on Canvas for the first time for \$79.99.
- Purchase MyLab Stat with eBook "24 month" access directly from Pearson when you sign in to MyLab Stat on Canvas for the first time for \$114.99
- Purchase a MyLab Stat with eBook "18-week" access code card from the Clemson campus bookstore before signing in to MyLab Stat for the first time for \$93.90.

Note: Students who will be taking the subsequent course, STAT 3300, that uses our same textbook should choose the "24 month" access option.

3. Calculator

A scientific calculator such as a TI-30 is required (a graphing calculator such as a TI-84 is permitted). Students will need to have a calculator with them for every lecture and lab class, and for every exam. Students will not be permitted to use the calculator functions on their laptop computers or cell phones as a substitute for a calculator.

4. JMP® Statistical Software

Students will learn how to analyze data using the statistical software package JMP (pronounced "jump"), which is available as a free web download for Clemson students at http://ccit.clemson.edu/support/current-students/software-and-applications/web-downloads/. The use of JMP will be required to complete both the lab assignments and the MyLab Stat assignments.

Websites

https://mthsc.clemson.edu/ug_course_pages/STAT2300 - General STAT 2300 site which includes this syllabus, a daily schedule, unit learning objectives, announcements, and other useful information.

www.clemson.edu/canvas/ – Follow links to your section of STAT 2300 and STAT 2301 in Canvas. Students are responsible for checking this website and their university email account (userid@clemson.edu) on a regular basis for announcements and class materials.

MyLab Stat is an on-line homework system that uses exercises from the *Statistics: Informed Decisions Using Data* textbook. It will be integrated in your Canvas course. **A copy of the eBook is located under the eText link on the course home page menu.** If you have any technical difficulties with MyLab Stat, you can reach Technical Support by going to https://support.pearson.com/getsupport/s/.

Required Technology

- 1. JMP® Statistical Software
 - The JMP® (pronounced "jump") software is available as a free download for Clemson students at: https://ccit.clemson.edu/support/current-students/software-and-applications/web-downloads/.
- 2. Students are expected to be comfortable accessing the online course site and downloading files. Those enrolled in the course must be comfortable with their computer system and be willing to deal with any problems that may arise. Minimum requirements include:
 - Access to a computer with speakers or headphones as the course includes audio components.
 - Web camera and microphone (integrated with laptop is sufficient)
 - Regular and reliable internet access.
- 3. You are responsible for checking the course website, Canvas and your university e-mail account (userid@clemson.edu) on a regular basis for announcements and class materials.
- 4. LockDown Browser + Webcam Requirement
 This course requires the use of LockDown Browser and a webcam for online exams. The webcam
 can be the type that's built into your computer or one that plugs in with a USB cable.

Weekly Structure of the Course

Students will attend lecture class sessions with their instructor during their STAT 2300 lecture class time on Mondays/Wednesdays. Please see your instructor's supplemental syllabus for details about the modality and structure of your lecture class meetings.

Students will attend synchronous Zoom sessions with their lab instructor during their lab class time (either on Tuesday or Thursday depending on the STAT 2301 section they are registered for) and complete the lab assignment in Canvas. In the lab meetings, course material will be reinforced through application problems, hands-on activities, simulations, simple experiments, and the use of statistical software. Please see the STAT 2301 lab syllabus for details.

Grading Policy

The final STAT 2300 course average will be determined by the following:

- The STAT 2301 lab grade, weighted 15%
- MyLab Stat homework assignments, weighted 15%
- Section grade, weighted 5%
- Scores on 3 unit tests, weighted 15% each (45% combined)
- The final exam score, weighted 20%

The final numerical course average is computed according to the more favorable of the two methods shown below:

Method 1	
MyLab Stat Homework	15%
Lab Grade	15%
Section Grade	5%
3 Tests @ 15% Each	45%
Final Exam	20%
Total	100%

Method 2	
MyLab Stat Homework	15%
Lab Grade	15%
Section Grade	5%
Best 2 of 3 Tests @ 15% Each	30%
Final Exam	35%
Total	100%

This policy has the effect of replacing the lowest test score with the final exam score if this improves the final course average. No extra credit work will be given and no grades will be curved.

Final Exam Policy for Spring 2021

Due to the University's modified final exam policy, the following changes will be implemented in STAT 2300 in Spring 2021:

Students will be provided with a course grade on the last day of classes, Friday, 4/23. Students may opt to accept that course grade and exempt the final exam.

Course Grade Calculation for Exempted Final: The course average for students who choose to exempt the final will be calculated out of a total of 80% as follows:

(.15*MyLab Stat Homework + .15*STAT 2301 Lab Average + .05*Section Grade + .15*Test 1 + .15*Test 2 + .15*Test 3) / .80

If a student chooses to take the final exam, the final exam will count towards their course grade and their final grade will be determined by the more favorable of Methods 1 or 2.

Students must formally confirm their decision regarding exempting the final exam by Sunday, 4/25 at 11:59 pm by completing a survey on Canvas.

The course grade is calculated according to the usual 10-point grading scale. That is, the minimum course average for an A is 90, for a B is 80, for a C is 70, for a D is 60, and below 60 is an F.

Lab Assignments

The STAT 2301 lab grade will consist of 10 online lab assignments. Students will attend Zoom sessions during their lab class time and complete the lab assignment in Canvas. Please see the STAT 2301 lab syllabus for details. To allow for illness, family emergencies, and religious holidays, one low (or missing) lab grade will be dropped in the calculation of the final lab grade.

MyLab Stat Homework Assignments

There are 24 MyLab Stat homework assignments. It is the student's responsibility to complete the homework assignment prior to 11:59pm on the due date (5pm on test days), no exceptions. Note that instructors must manually enter a grade of zero for all incomplete homework assignments, and as such the homework grade posted in MyLab Stat will be artificially high until this is done. To allow for illness, family emergencies, religious holidays, and computer malfunctions, two low (or missing) homework grades will be dropped before the final homework grade is calculated.

In general, within a given generation of a homework problem students will have two attempts to correctly answer each multiple-choice part and three attempts for each free response part. Additionally, students will have up to five re-generations of a homework problem by selecting **Similar Exercise**. This requires all parts of a problem to be re-worked, but will save the best score. The **View an Example** option shows a similar example with explanations but will not re-generate the current problem. The **Help Me Solve This** option shows how to solve the current generation of a problem, but requires students to solve a new generation of a problem once they return (and will reduce the number of re-generations allowed by one). You can review a past due assignment at any time by going to the Gradebook section and clicking on the **Review** link for that assignment.

Pay careful attention to the number of decimal places requested for a final answer. Entering in more or fewer decimal places than requested will cause an answer to be marked incorrect. In order to make sure that an answer is within the range of acceptable values, students should *carry out all intermediate calculations to five decimal places*. Also pay attention to any **Instructor Tips** that give information about how to solve the problem using JMP.

NOTE: The lab assignment and homework components of the course grade often will not accurately reflect the final course grade.

Section Grade

The section grade activities will be determined by each lecture instructor. These activities will take place during the lecture class sessions and may include in-class learning activities or participating in poll questions. Please see your instructor's supplemental syllabus for details about your section grade.

Unit Tests and the Final Exam

All exams must be taken on the dates given in the course schedule. The exams will be online and will require the use of the Respondus Lockdown Browser and Monitor (Webcam). Note that the final exam is comprehensive. Please see the Final Exam Policy for Spring 2021 on page 4. The designated time for STAT 2300 unit exams is Mondays from 5:30pm – 7:00pm. The dates for the unit tests are as follows:

Exam 1 – February 8 Exam 2 – March 8 Exam 3 – April 12

The final exam date and time is: Final Exam – April 26 at 11:30 am- 2:00 pm.

Students will be given 90 minutes (1.5 hours) to complete each unit test and 150 minutes (2.5 hours) for the final exam. The material to be covered on each unit test is specifically outlined in the Unit Learning Objectives documents on the course website. The use of a textbook or notes is prohibited on all unit tests and the final exam, but students will be provided with a formula sheet that will be posted in advance. Use of unapproved technology will lead to a charge of academic dishonesty. You may not contact anyone other than the instructor during an exam.

An absence from a test or exam will result in a grade of zero. Note that the final exam score can be used in place of a missing test score for one exam only. In general, make-up tests are not given. However, if a student misses a unit test or the final exam for a reason that would qualify as an excused absence and can provide the proper documentation, a make-up test may be permitted if the request is made no later than **24 hours <u>prior</u> to the scheduled test or exam.** Realize that a note simply stating a student was at Redfern on the date of the exam does not qualify as proper documentation. An excused absence for medical reasons will only be granted if a note from a doctor that indicates the student should not attend work or school on the date of the exam can be provided.

No rescheduling of any exam will be permitted to accommodate travel arrangements. Per Clemson University policy, a student who has more than two final exams in one calendar day, or two final exams at the same time, should contact the instructors no less than one week prior to the last class meeting to reschedule an exam. Common exam times, regardless of course number, may not be rescheduled.

Attendance

You are expected to be regular and punctual in your class attendance, whether in person or online. For more details about how attendance will be taken in your lecture section, see your instructor's supplemental syllabus.

Canvas allows you as a student to quickly notify instructors of an absence from class and provides set categories (e.g. court attendance, illness, family illness or death, military duty, hospitalization, university function, religious observance). This does not serve as an excuse from class but allows students to communicate with instructors (all or some, of their choice). Consult with instructors when discussing absences. The Dean of Students' office can also be of assistance.

If you report testing positive for COVID or have been asked to quarantine/isolate because of exposure to the virus, it will be up to you to inform your instructor that you will be moving to online only instruction for at least the next two weeks. Students are directed to use the Notification of Absence module in Canvas to initiate this notification. Additional communication via email is encouraged; you should follow up with your instructor to develop a continued plan of study.

A student with an excessive number of absences may be withdrawn at the discretion of the course instructor. For the Spring 2021 semester, "excessive absences" would be applicable to students that never engage in class activity (in person and/or online).

If an instructor does not arrive to class within 15 minutes after the scheduled start time, class is dismissed for the day.

Because privacy regulations stipulate that faculty and staff communicate with students through authorized University channels, use your University email account.

Additional Requirement for Students not in Eastern Time Zone

The student must be able to attend class meetings and testing times (virtually) at scheduled Eastern time and meet other assignment deadlines in Eastern time.

Success in the Course

In order to be successful in this course, students must be dedicated to the course work. Studying is critical for a student to master the learning objectives of this course. Students are expected to aggressively participate in their own learning by reading the e-textbook, practicing the course skill sets (found in the Unit Learning Objectives on the course website) and seeking help in a timely manner when necessary. Below are some resources to support your learning in this course:

Homework Help Lab Hours

A lab instructor will conduct Homework Help hours via Zoom every Monday and Wednesday. See the schedule posted on the lab Canvas for times and instructors on duty. These drop-in hours are for students to get help with the homework from the lab instructor on duty. Students are expected to begin their homework early enough such that they are able to attend homework help hours if they experience difficulties completing the assignment.

Tutoring through the Academic Success Center

The Academic Success Center provides free services, including tutoring, academic coaching, and academic skills workshops, for all Clemson students. Visit the Academic Success Center website http://www.clemson.edu/asc/ for more information on their services and workshops.

This course is supported by the Academic Success Center tutoring program. The ASC tutors have completed and done well in this course, and they understand the concepts well enough to help you work through questions you have. The ASC tutoring program is certified by the College Reading and Learning Association which means that our tutors are trained to share learning and study strategies during tutorial sessions. While tutors will not complete/correct homework for you or help

you on tests or quizzes, they will help you understand and reinforce concepts that you are learning in your classes. For more information visit www.clemson.edu/asc/courses/tutoring/index.html.

Online Conduct

Appropriate online academic conduct means maintaining a safe learning environment based on mutual respect and civility. All participants in Clemson courses are expected to behave professionally by adhering to these standards of conduct:

- Never transmit or promote content known to be illegal.
- Respect other people's privacy as well as your own.
- Forgive other people's mistakes.
- Never use harassing, threatening, embarrassing, or abusive language or actions.

Online communication that fails to meet these standards of conduct will be removed from the course. Repeated misconduct may result in being blocked from online discussions, receiving a grade penalty, or being dismissed from the course. Such misconduct in the online environment may also be reported to officials for appropriate action in accordance with University policy. If you ever encounter inappropriate content in our course, please contact me with your concerns.

Accessibility Statement

Clemson University values the diversity of our student body as a strength and a critical component of our dynamic community. Students with disabilities or temporary injuries/conditions may require accommodations due to barriers in the structure of facilities, course design, technology used for curricular purposes, or other campus resources. Students who experience a barrier to full access to this class should let the professor know and make an appointment to meet with a staff member in Student Accessibility Services as soon as possible. You can make an appointment by calling 864-656-6848 or by emailing studentaccess@lists.clemson.edu.

Students who receive Academic Access Letters are strongly encouraged to request, obtain and present these to their professors as early in the semester as possible so that accommodations can be made in a timely manner. It is the student's responsibility to follow this process each semester. You can access further information here: https://www.clemson.edu/academics/studentaccess/.

Academic Integrity Policy

Students are expected to adhere to the following Clemson University Academic Integrity Policy: "As members of the Clemson University community, we have inherited Thomas Green Clemson's vision of this institution as a 'high seminary of learning.' Fundamental to this vision is a mutual commitment to truthfulness, honor, and responsibility, without which we cannot earn the trust and respect of others. Furthermore, we recognize that academic dishonesty detracts from the value of a Clemson degree. Therefore, we shall not tolerate lying, cheating, or stealing in any form."

Title IX (Sexual Harassment) Statement

Clemson University is committed to a policy of equal opportunity for all persons and does not discriminate on the basis of race, color, religion, sex, sexual orientation, gender, pregnancy, national origin, age, disability, veteran's status, genetic information or protected activity (e.g., opposition to prohibited discrimination or participation in any complaint process, etc.) in employment, educational

programs and activities, admissions and financial aid. This includes a prohibition against sexual harassment and sexual violence as mandated by Title IX of the Education Amendments of 1972.

The University is committed to combatting sexual harassment and sexual violence. As a result, you should know that University faculty and staff members who work directly with students are required to report any instances of sexual harassment and sexual violence, to the University's Title IX Coordinator. What this means is that as your professor, I am required to report any incidents of sexual harassment, sexual violence or misconduct, stalking, domestic and/or relationship violence that are directly reported to me, or of which I am somehow made aware.

There are two important exceptions to this requirement about which you should be aware: Confidential Resources and facilitators of sexual awareness programs such as "Take Back the Night and Aspire to be Well" when acting in those capacities, are not required to report incidents of sexual discrimination.

Another important exception to the reporting requirement exists for academic work. Disclosures about sexual harassment, sexual violence, stalking, domestic and/or relationship violence that are shared as part of an academic project, a research project, classroom discussion, or course assignment, are not required to be disclosed to the University's Title IX Coordinator.

This policy is located at http://www.clemson.edu/campus-life/campus-services/access/title-ix/. Ms. Alesia Smith is the Executive Director for Equity Compliance and the Title IX Coordinator. Her office is located at 223 Holtzendorff Hall, phone number is 864.656.3181, and email address is alesias@clemson.edu.

Inclement Weather:

Any assignments due at the time of a class cancellation due to inclement weather will be due at the next class meeting unless contacted by the instructor. Any extension or postponement of assignments or exams must be granted by the instructor via email or Canvas within 24 hours of the weather related cancellation. In the event of the university closing during a scheduled exam, your instructor will notify you as to the date of rescheduled exam.

Specific COVID-19 related information for in-person classes

While on campus, face coverings are required in all buildings and classrooms. Face coverings are also required in outdoor spaces where physical distance cannot be guaranteed. Please be familiar with the additional information on the Healthy Clemson website, such as the use of wipes for inperson classes. If an instructor does not have a face covering or refuses to wear an approved face covering without valid accommodation, students should notify the department chair. If a student does not have a face covering or refuses to wear an approved face covering without valid accommodation, the instructor will ask the student to leave the academic space and may report the student's actions to the Office of Community & Ethical Standards as a violation of the Student Code of Conduct. If the student's actions disrupt the class to the extent that an immediate response is needed, the instructor may call the Clemson University Police Department at 656-2222.

Copyright Notice

Materials used in connection with this course may be subject to copyright protection by Title 17 of the United States code. Students are not allowed to post course materials, including completed lecture notes and lab assignments, to commercial websites such as Course Hero or Study Soup. Students that fail to comply with these restrictions may be liable for copyright infringement.

Emergency Preparedness

Clemson University is committed to providing a safe campus environment for students, faculty, staff, and visitors. As members of the community, we encourage you to take the following actions to be better prepared in case of an emergency:

- 1. Ensure you are signed up for emergency alerts (https://www.getrave.com/login/clemson),
- 2. Download the Rave Guardian app to your phone (https://www.clemson.edu/cusafety/cupd/rave-guardian/)
- 3. Learn what you can do to prepare yourself in the event of an active threat (http://www.clemson.edu/cusafety/EmergencyManagement/)

Academic Continuity Plan

Clemson has developed an Academic Continuity Plan for academic operations. Should university administration officially determine that the physical classroom facility is not available to conduct classes in, class will be conducted in a virtual (online) format. The University issues official disruption notifications through email texts and Social Media.

When notified, use one of the following links to navigate to Clemson Canvas where you will find important information about how we will conduct class:

Primary access link: www.clemson.edu/canvas

Secondary access link, if needed: https://clemson.instructure.com/

You can also use the Canvas Student App.

Supplemental Course Information

Each instructor will provide a supplement to this syllabus with information pertinent to their section of STAT 2300 and each lab instructor will provide a syllabus for their STAT 2301 section.

Course Coordinator: Dr. Paran Norton, pfisch@clemson.edu

Please be aware that all office hours are virtual, so e-mail is the best way to contact me.
